Company Fact Sheet

Overview

Adaptive Curriculum develops standards-based online math and science software for grades 6-12, using an interactive pedagogy to engage today's students and over 400 online lesson plans to support effective teaching.

Mission

The Adaptive Curriculum mission is to inspire students with active online learning, engage them in math and science concept mastery, and motivate them to succeed.

Pedagogical Approach

Over 400 online math and science activity objects use a highly visual approach and a research-based pedagogical model with five learning steps—Engage, Explore, Explain, Elaborate, Evaluate.

Research Partnership

Adaptive Curriculum partners with Technology Based Learning and Research (TBLR) at Arizona State University on curriculum alignment, classroom implementation, and professional development services.
