FOR IMMEDIATE RELEASE

ADAPTIVE CURRICULUM'S INNOVATIVE MATH AND SCIENCE PROGRAM
WINS SIIA CODiE AWARD FOR BEST VIRTUAL SCHOOL SOLUTION

The educational software developer takes home the prestigious CODiE award in the category that recognizes solutions that best deliver courses or degree programs online

Scottsdale, Ariz. — May 10, 2012 — Adaptive Curriculum (AC), a web-based concept mastery solution that strengthens math and science performance by helping students build a deep understanding of core concepts and skills, has won the 2012 CODiE Award for Best Virtual School Solution for Students. Sponsored by the Software & Information Industry Association (SIIA), the prestigious CODiE Awards have been showcasing the software and information industry's finest products and services for the last 27 years.

The Best Virtual School Solution for Students category recognizes the K-12 or postsecondary educational solution that best delivers courses or degree programs online. Such solutions can be designed for tutoring, self-paced digital instruction, home schooling, advance placement course work, credit recovery, additional instructional support, personalized learning environments, or college credit. According to the SIIA, Adaptive Curriculum's products were "chosen from a selection of high-caliber technology options as being the best in the software and information industry."

"We hear from educators every day that Adaptive Curriculum's focus on interactive engagement and deep conceptual learning makes it possible for every student to be successful in math and science. But it's still very nice to know that our industry peers also recognize the innovation and richness of content that make up Adaptive Curriculum's solutions," said Jim Bowler, CEO of Adaptive Curriculum.

The CODiE Awards hold the distinction of being the industry's only peer-reviewed awards program. Nominated products were reviewed extensively by executives with deep industry expertise and who acted as judges to select the finalists across 25 different categories. The products were reviewed through live demonstrations, trial access, and supplementary documentation. Software members include the companies developing the applications, services, infrastructure, and tools that are driving the software and services industry forward.

Adaptive Curriculum engages digital-age learners by integrating real-world scenarios, cutting-edge graphics, animations, 3D models and interactive simulations into active, standards-based learning. Unlike textbooks or drill-and-practice programs, Adaptive Curriculum's active learning approach motivates learners to explore, make hypotheses, manipulate items and see the impact of their decisions, thus developing and deepening their conceptual understanding.

About Adaptive Curriculum

Designed for grades 6-12, Adaptive Curriculum's web-based math and science solutions are used by more than 3 million students in the United States, Europe and Asia. Across the world, experts in math, science and online learning theory contribute to the content and design of the interactive activities to deliver effective instruction that improves performance on high-stakes tests and enhances college and career readiness.

Adaptive Curriculum is part of Sebit Inc., a global eLearning company and leader in digital curriculum innovation. For more information please call 1-888-999-9319 or visit www.adaptivecurriculum.com.
